Find Your Account Number

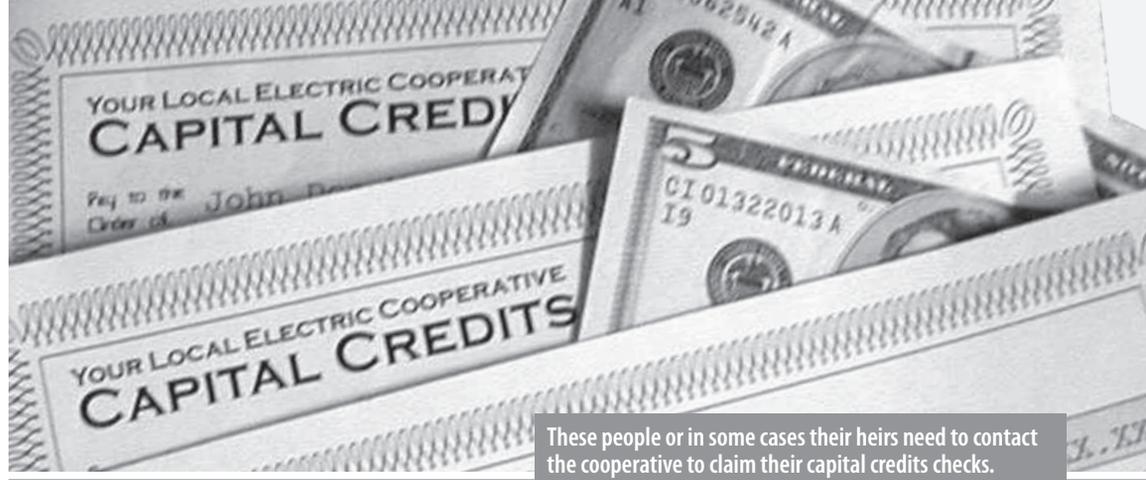

A member's account number has been hidden somewhere in this newsletter. If you find your number, call the office before Aug. 30 and you will receive a \$40 credit on your next month's billing. If no one finds their account number, the credit will be \$50 in the next issue. Happy searching!

There's more than one football field's length of buried utilities for every man, woman and child in the U.S.

There are more than 100 billion feet of underground utilities in the United States, according to data compiled by CGA from various industry groups.

Don't be a statistic. Call 811 before digging.

45 percent of American homeowners who plan to dig this year said in a recent survey that they would NOT call 811 beforehand, putting themselves and their communities at risk.

These people or in some cases their heirs need to contact the cooperative to claim their capital credits checks.

What are Capital Credits?

An electric cooperative operates on an at-cost basis by annually “allocating” to each member, based upon the member’s purchase of electricity, operating revenue remaining at the end of the year; later, as financial condition permits, these allocated amounts – capital credits – are retired. Capital credits represent the most significant source of equity for Lacreek Electric. Since a cooperative’s members are also the people the co-op serves, capital credits reflect each member’s ownership in, and contribution of capital to, the cooperative. This differs from dividends investor-owned utilities pay shareholders, who may or may not be customers of the utility. Each year, the Lacreek board of directors makes a decision on whether to retire capital credits based on the financial health of the cooperative. During some years, the co-op may experience high growth in the number of new accounts or severe storms may result in the need to spend additional funds to repair lines. These and other events might increase costs and decrease member equity, causing the board not to retire capital credits. For this reason, Lacreek’s ability to retire capital credits reflects the cooperative’s strength and financial stability. The board alone decides whether to retire capital credits.

The checks listed issued in 2018 have not been claimed. If you know any of the members listed below and have the ability to contact them, please have them call our office or if you see your name on this list, please contact us at 605-685-6581 or long distance (toll free) 1-800-655-9324.

This institution is an equal opportunity provider and employer.

This publication is mailed the 15th of the month prior to the issue date. Layout is at least three weeks prior to mailing. LACREEK ELECTRIC COOPERATIVE CONNECTIONS is published monthly by Lacreek Electric Association, Inc., PO Box 220, Martin, SD 57551 for its members. Families subscribe to Lacreek Electric Cooperative Connections as part of their electric cooperative membership.

Subscription information: Electric cooperative members devote 50 cents from their monthly electric payments for a subscription. Nonmember subscriptions are available for \$12 annually. Periodicals Postage Paid at Martin, SD and at additional mailing offices.

POSTMASTER: Send address changes to: Lacreek Electric Cooperative Connections, PO Box 220, Martin, SD 57551; telephone (605) 685-6581; fax (605) 685-6957

Forty-nine teens from eight South Dakota electric cooperatives spent July 23-26 exploring energy production, careers and cooperatives.

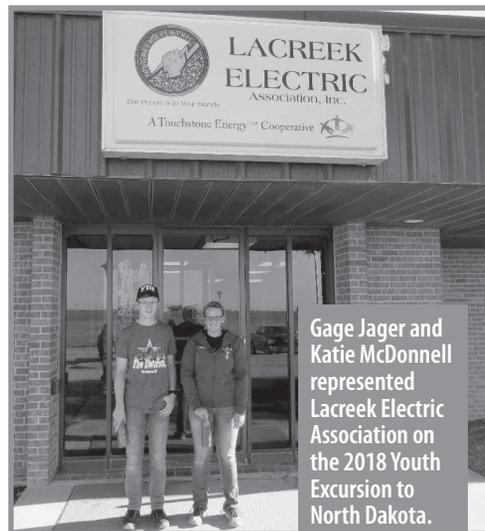

ENERGY EXPLORERS

Lacreek Sends Youth to N.D.

Stacey Robinson

stacey@lacreek.com

South Dakota electric cooperatives sent a group of young people to North Dakota to experience energy production and the process by which it is delivered to their homes and businesses. On the first day of touring, the students visited the National Energy Center of Excellence at Bismarck State College in Bismarck, N.D. At these stops, they learned how energy is produced, marketed and delivered. Gage Jager and Katie McDonnell were Lacreek’s winners.

Gage Jager and Katie McDonnell represented Lacreek Electric Association on the 2018 Youth Excursion to North Dakota.

Gage and Katie pose for a photo outside the Antelope Valley Station, a 900-megawatt coal-based power plant. Electricity from the power plant is part of Basin Electric Power Cooperative’s generation portfolio. Lacreek Electric gets part of its power from Basin Electric.

College Bound?

Keep Safety in Mind

There are several specific causes for fires on in on- and off-campus college housing, including cooking, candles, smoking and overloaded power strips. For most students, the last fire safety training they received was in grade school, but with new independence comes new responsibilities. It is important that both off-campus and on-campus students know their fire risks and prevention actions that could save their lives.

Cooking

- Cook only where it is allowed.
- Keep your cooking area clean and free of anything that can burn.
- Keep an eye on what you are cooking, especially if you are cooking at high temperatures.
- If a fire starts in a microwave, keep the door closed and unplug the unit.

Candles

- Place candles in sturdy holders.
- Never leave a burning candle unattended.
- Keep candles away from anything that can burn.
- Use safe flameless candles.

Smoking

- Make sure cigarettes and ashes are out. Never toss hot cigarette butts or ashes in the trash can.
- Use deep, wide ashtrays. Place ashtrays on something sturdy and hard to burn.
- After a party, check for cigarette butts, especially under cushions. Chairs and sofas catch on fire fast and burn fast.
- Don't smoke when you have been drinking or are drowsy.

Electrical safety

- Keep lamps, light fixtures, and light bulbs away from anything that can burn.
- Never use an extension cord with large appliances, like a refrigerator.
- Do not overload outlets.
- Use only surge protectors or power strips that have internal overload protection.

Are You Registered?

National Voter Registration Day is a national holiday celebrating our democracy. It was first observed in 2012 and has been growing in popularity every year since. Held on the fourth Tuesday of September, National Voter Registration Day will be observed on Tuesday, Sept. 25, this year. The holiday has been endorsed by the National Association of Secretaries of State (NASS). It is further supported by the National Association of State Election Directors (NASED).

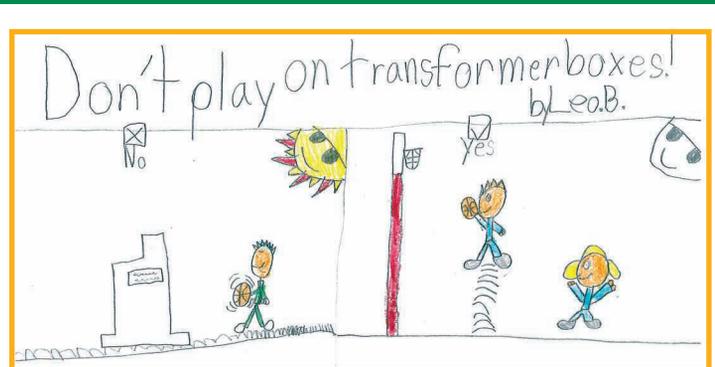

South Dakotans seeking to vote in the Nov. 6 general election must be a U.S. citizen residing in South Dakota and be 18 years old on or before Election Day. Voter registration forms must be received by the county auditor 15 days before the election day. Additionally, those seeking to vote may register at the county auditor's office, a driver's license station, city finance office, public assistance agencies providing food stamps, TANF or WIC, Department of Human Services offices which provide assistance to the disabled or military recruitment offices.

Minnesotans must be a resident of the state for 20 days prior to the election. They can register online, in person or on election day.

For more information, visit <https://www.sos.state.mn.us/elections-voting/register-to-vote/> or call the Minnesota Secretary of State's office at 1-877-600-VOTE (8683) or contact your county election office.

KIDS CORNER SAFETY POSTER

"Don't play on transformer boxes."

Leo Bakeberg IV, Second-grader at Dupree Public School

Leo is the son of Leo Bakeburg and Amanda Grewe, Dupree, S.D. They are members of Moreau-Grand Electric Cooperative, Timber Lake, S.D.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

Garden Goodness

Cheesy Sausage and Potato Skillet Casserole

- | | |
|--|---|
| 8 oz. bulk breakfast sausage, crumbled | 1/4 tsp. McCormick® Black Pepper, Coarse Ground |
| 1 medium onion, chopped | 1-1/2 cups shredded mozzarella cheese |
| 1 medium green bell pepper, chopped | 1 cup crumbled feta cheese |
| 6 eggs | 2 plum tomatoes, seeded and chopped |
| 1 cup milk | 1 T. oil |
| 1 T. McCormick® Oregano Leaves | 1 (20 oz.) pkg. refrigerated shredded hash browns |
| 1/2 tsp. salt | |

Cook and stir sausage in large skillet on medium heat 5 minutes or until lightly browned. Add onion and bell pepper; cook and stir 5 minutes or until vegetables are tender. Set aside. Beat eggs in large bowl with wire whisk. Add milk, oregano, salt and pepper; mix well. Add sausage mixture, cheeses and tomatoes; mix well. Set aside. Pour oil into same skillet, swirling to coat the pan. Spread hash browns in bottom and up sides of pan. Pour egg mixture over potatoes. Cover. Cook on medium heat 10 to 15 minutes or until eggs are set. Makes 12 servings

Pictured, Cooperative Connections

Zucchini Hot Dish

- | | |
|--|------------------------|
| 1 medium unpeeled zucchini, washed, seeded and cut into chunks | Sliced onion |
| | Sliced green pepper |
| 1-1/4 cups uncooked rice | American cheese slices |
| Fresh sliced tomatoes | Uncooked bacon |

Spray a 10x10-inch casserole dish. Layer zucchini chunks in bottom of pan. Sprinkle rice over top of zucchini. Place a layer of tomatoes, sprinkled with oregano, salt and pepper over rice. Next, top this with a layer of onion, green pepper and cheese slices. Lastly, place layer of bacon over all. Bake, covered, at 350°F. for 1-1/2 hours. The raw ingredients will provide enough moisture to cook the rice.

Gail Lyngstad, Pierre, SD

Sandi's Tomato Garden Salad

- | | |
|--------------------------|--|
| 3/4 cup sugar | 6 large tomatoes, coarsely chopped |
| 1/2 cup olive oil | 1 large onion, coarsely chopped |
| 2/3 cup tarragon vinegar | 2 green peppers, coarsely chopped |
| 2 T. yellow mustard | 2 cucumbers, coarsely chopped (optional) |
| 2 T. parsley | Rotini noodles, cooked |
| 1 tsp. basil | |
| 1 tsp. thyme | |
| Salt and pepper to taste | |

In a large bowl, mix together first 8 ingredients. Add vegetables. Refrigerate overnight.

Sandi Polkinghorn, Lake City, SD

Apple Corn Bread Crisp

- | | |
|--|--|
| 4 cups peeled, sliced tart apples, about 4 to 5 medium | 1 (8.5 oz.) pkg. corn bread/muffin mix |
| 3/4 cup packed brown sugar, divided | 1 tsp. ground cinnamon (or to taste) |
| 1/2 cup quick-cooking oats | 5 T. cold butter, cubed |

Stir together apples and 1/4 cup brown sugar. In another bowl, combine corn bread mix, oats, cinnamon and remaining brown sugar. Cut in butter until crumbly. Add 1/2 cup corn bread mixture to apples. Transfer to a greased 8-inch square baking dish. Sprinkle remaining corn bread mixture over top. Bake at 350°F. for 30 to 35 minutes or until filling is bubbly and topping golden brown. Serve warm.

Jean Osterman, Wheaton, MN

Please send your favorite pasta, slow cooker and holiday favorites recipes to your local electric cooperative (address found on Page 3).

Each recipe printed will be entered into a drawing for a prize in December 2018. All entries must include your name, mailing address, telephone number and cooperative name.

Attractive, Convenient Combo Screen/Storm Door Saves Energy Year-Round

James Dulley

Collaborative Efficiency

Before you consider adding a new combo screen/storm door, make sure your primary door closes tightly and seals well.

The following companies offer combo doors:
Andersen, (800) 933-3626, www.andersenwindows.com;
Homeguard Industries, 800-525-1885, www.home-guard.net;
Larson, 888-483-3768, www.larsondoors.com;
Pella, 800-374-4758, www.pella.com; and
ProVia, 800-669-4711, www.proviadoor.com.

Send inquiries to James Dulley, Cooperative Connections, 6906 Royalgreen Dr., Cincinnati, OH 45244 or visit www.dulley.com.

Dear Jim: My screen door needs replacement. I thought about getting screen/storm combo door with a glass panel for winter. Is it worthwhile to spend extra for the combo door? – Seth G.

Dear Seth: A primary door is a relatively small area, but even an insulated one can lose a significant amount of energy. Doors typically have glass (lower insulation value) and the 10 feet of weatherstripping leaks air, so adding a combo door makes energy sense.

Before you consider adding a new combo screen/storm door, make sure your primary door closes tightly and seals well. Adding a combo door will certainly improve energy efficiency, but it is not designed to correct problems with an old warped primary door.

If possible, purchase replacement weatherstripping for your existing doors from the original manufacturer. If you cannot find it, most home center stores sell styles of generic weatherstripping which should fit. Pry off the old door molding, fill any gaps around the framing with foam insulation and caulk around the primary door frame.

The combo door construction is important for a nice appearance, long life and security. It must withstand a lot of abuse, so don't just pick the cheapest one. High quality ones, like Provia Spectrum, have internal polymer corner supports, rigid insulated foam core, reinforced kick panels and triple bottom sweep weatherstripping.

Buying an aluminum combo door and installing it yourself is typically the lowest-cost option. Aluminum combo doors are lightweight with the glass panels removed so installing one is a simple do-it-yourself project. They are made to the standard sizes of primary door frame openings.

With the store display door attached to a wooden door frame, the aluminum frame feels strong. When you open the box at home, the unattached aluminum frame strips are flexible. Be careful not to kink them during handling. Apply a bead of silicone or siliconized acrylic caulking on the aluminum frame before screwing it to the door opening.

The most convenient design of combo door uses one or two spring-mounted roll-up retractable screens built into the door. For ventilation, just lower the glass and pull the screens down. This design is attractive because the screening is hidden away during winter.

If you plan to use natural ventilation during the summer, a self-storing triple-track combo door is a reasonably priced option. The screen panel has its own vertical track in the door, so it never has to be removed. At winter's end, slide one of the glass panels down and slide the screen panel up.

For families with large pets or active children who may damage the screening, durable stainless steel screen fabric is available in retractable screen doors. It also is a simple DIY project to add this durable screening to a panel door. Buy a slightly smaller spline because the new screening is thicker. A spline installation roller tool costs only a few dollars.

If your budget is tight, consider making your own door. Mount hinges in the existing door opening for the storm door. Make a simple wood frame for the new door with only the top half open and a plywood lower panel. This panel improves the door's rigidity for a more airtight seal and better durability.

Most home center stores carry sheets of clear acrylic plastic to mount in the frame. Make another narrow wooden frame slightly larger than the open half and mount the acrylic sheet in it. Screw it over the door opening. Make a similar frame with screening in it for summer use.

If you prefer more durability and efficiency and a perfectly clear view outdoors is not critical, select double-walled polycarbonate instead of acrylic.

Nail 1/2-inch-wide spring steel weatherstripping in the door opening on the latch side and top and bottom. This type of weatherstripping is very durable where there is sliding friction. Adhesive backed 3/4-inch foam weatherstripping is effective in compression on the hinge side.

Dedication, Service Recognized

Area duo to be inducted into South Dakota Cooperative Hall of Fame

Two area men – Dale Locken of Akaska and Kermit Pearson of Lake City – will be inducted into the South Dakota Cooperative Hall of Fame during the Co-op Month Banquet and Induction Ceremony Sept. 11 at The Lodge at Deadwood, S.D.

Induction into the South Dakota Cooperative Hall of Fame is the highest honor that the cooperative community can bestow on those whose endeavors in the cause of the cooperative form of enterprise have been genuinely heroic.

Dale Locken, Agtegra Cooperative

Locken served as the CEWO of South Dakota Wheat Growers Association (now Agtegra Cooperative) from 2002 to 2017. As CEO, he had the vision to always pursue the next step to maintain the relevance of the cooperative system in South Dakota. Under his leadership, he saw the need for a merger with North Central Farmers Elevator (which occurred shortly after he stepped down as CEO). While at the helm at Wheat Growers, he developed the cooperative's strong safety culture, established the Connecting to Tomorrow Initiative to improve grain handling systems at 12 SDWG locations, established the Growing for Tomorrow Initiative which upgraded 15 locations to expand capacity in both grain handling and agronomy, led construction of the Kennebec Facility which involved rehabilitation of the railroad line along with construction of a new facility.

Dale Locken

Kermit Pearson, Lake Region Electric Association

First elected to the Lake Region Electric Association board of directors in 1980, Kermit Pearson has spent the last 38 years as a dedicated leader of electric cooperatives. By 1989, Pearson would be selected to represent LREA on the East River Electric Power Cooperative board and from there, in 1997, would become East River's voice on the Basin Electric Power Cooperative board. In 2013, he was selected to represent Basin Electric on the South Dakota Rural Electric Association board of directors.

Kermit Pearson

Under Pearson's leadership, LREA, East River and Basin Electric have engaged in innovative and visionary programs to best serve their members. He works to ensure that decisions made at the Basin Electric level are in the best interest for the regional East River Electric membership and local Lake Region Electric membership.

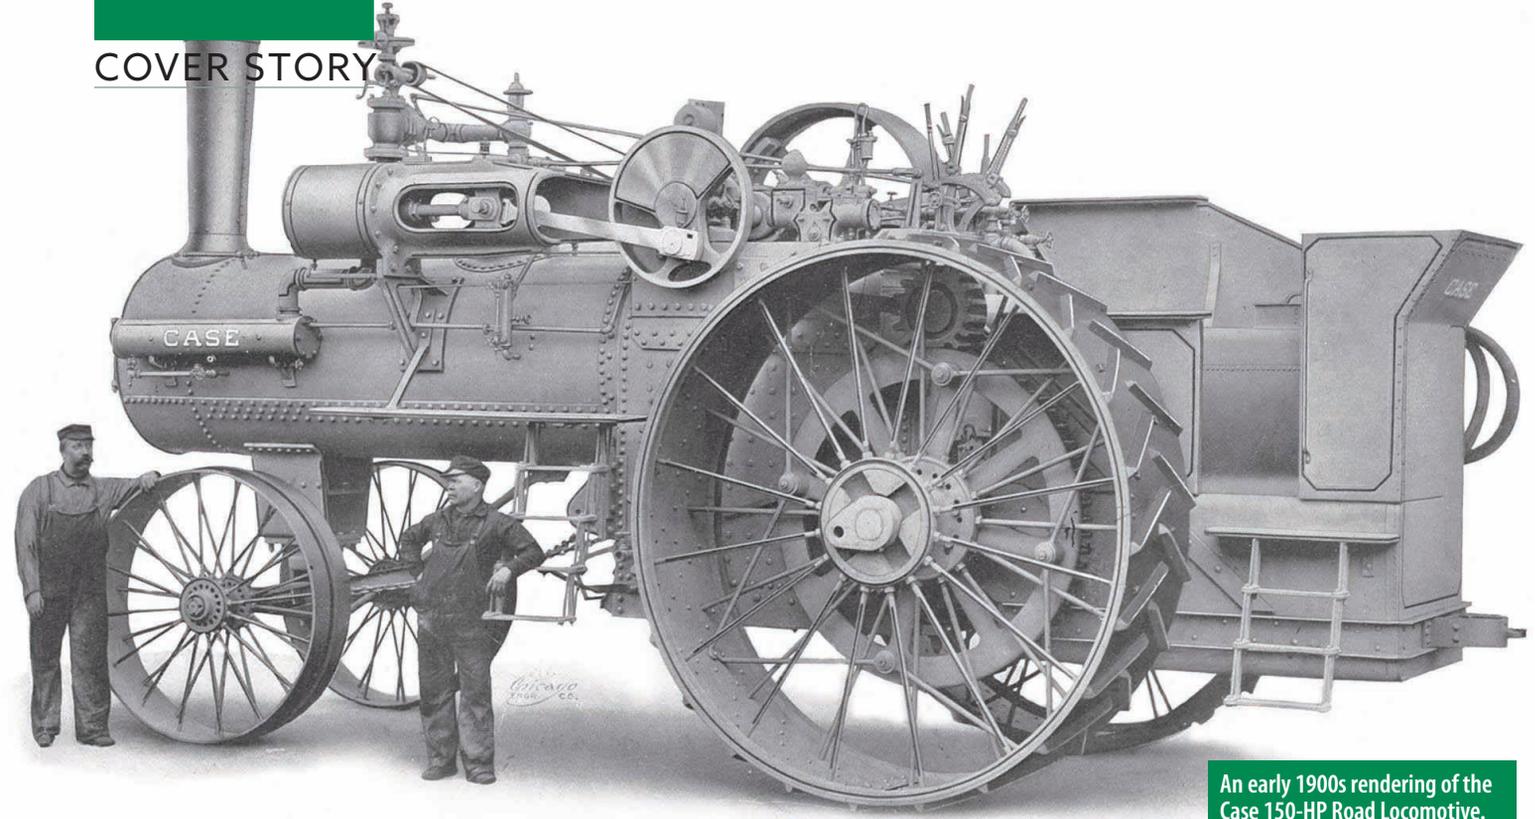

"He embraces and promotes the new innovations that benefit the membership," wrote LREA manager Tim McIntyre. "...his commitment to community and the membership shines as he inspires development and growth within each community."

Interested in attending?

To purchase tickets for the banquet, contact the South Dakota Association of Cooperatives by Sept. 1 at 116 N Euclid, Pierre, SD 57501. Tickets are \$40.

An early 1900s rendering of the Case 150-HP Road Locomotive.

STEAM POWER DREAM

Recreating the Case 150-HP Road Locomotive

Brenda Kleinjan

editor@sdrea.coop

A legacy preserved in pictures and technical drawings has been brought back to life and debuts Sept. 7-9 at the James Valley Threshing and Tractor Club Show at Andover, S.D.

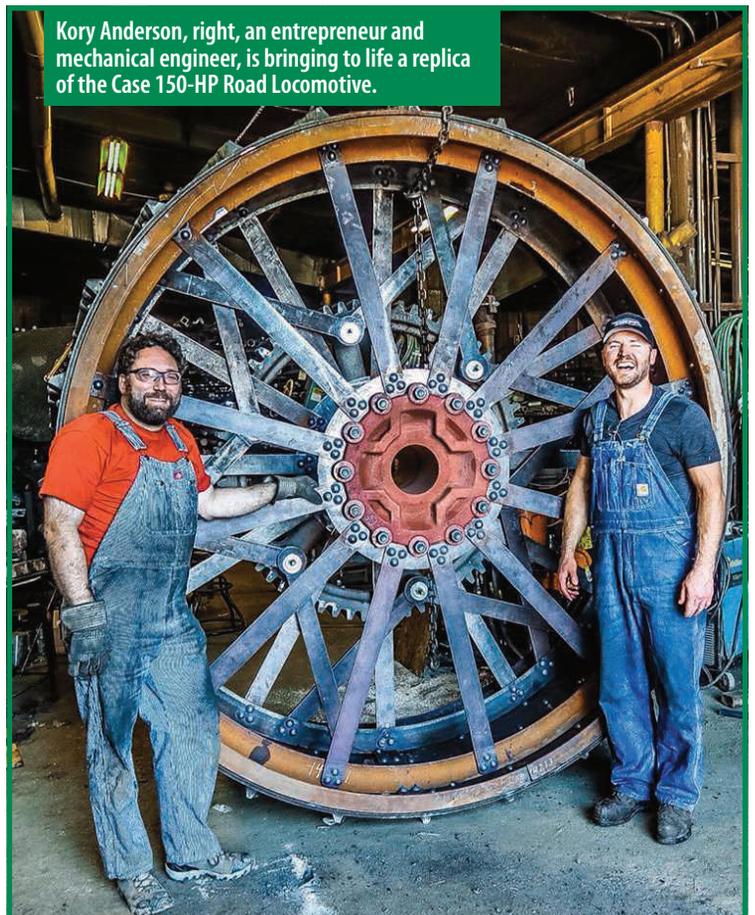

More than 100 years ago, the largest steam tractor ever produced – the 150-horsepower Case Road Locomotive – rolled off the drawing boards and onto the landscape. Fewer than 10 were produced and the behemoth's sheer power created technical issues for its ongoing reliability. But despite the issues that would eventually silence its massive engine, the giant – its rear wheels stood 8 feet tall and the front wheels reached the shoulders of a full-grown man – made an impression on Kory Anderson.

Anderson, an entrepreneur and mechanical engineer started with an idea 12 years ago to build a scale-model replica of the 25-foot, 10-foot wide machine. He spent the ensuing years researching the machine – including a visit to the Case archives in Wisconsin, recreating the drawings in CAD and researching what materials would overcome the original issues caused by lack of metallurgical advancements 100 years ago.

Anderson crafted mahogany molds for the parts that would need to be cast at Dakota Foundry in Webster. The services of an Amish boilermaker in Ohio would be secured.

The machine's rear wheels – each standing 8 feet tall and

Kory Anderson, right, an entrepreneur and mechanical engineer, is bringing to life a replica of the Case 150-HP Road Locomotive.

Case 150-HP Road Locomotive Specifications

from the Case archive documents:

- **BOILER** - Shell 42 inches in diameter.
- **TUBES** - Ninety-three 2 inch tubes, 108 1/2 inches long, of cold drawn, seamless steel tubing
- **FIRE BOX** - 58 1/4 inches long, 39 1/4 inches wide, and 45 inches high, made of the best open-hearth flange steel.
- **HEATING SURFACE** of boiler, 515 square feet. Grate area of boiler is 15.8 square feet.
- **BOILER PRESSURE** - The boiler tested at 350 pounds hydrostatic pressure, and can carry 160 pounds as a working pressure.
- **WATER TANK** - The capacity of the tank is about 500 gallons
- **WATER FEED** - An ejector will fill the water tank in eight minutes from any stream or other accessible water supply
- **FUEL CAPACITY** - The coal capacity is about 2,750 pounds.
- **ENGINE CYLINDER** - 14 inches diameter by 14 inch stroke.
- **HORSE POWER** - The engine easily develops 150 brake horse power running at its normal speed of 300 revolutions per minute.
- **TRACTION POWER** - The engine has been built for heavy hauling purposes and is capable of drawing 40 to 50 tons up grades from 5 percent to 10 percent. The engine itself, not loaded, will go up a 40 percent grade.

Photos by Anderson Industries, LLC

Kory Anderson, left, and Gary Bradley stand next to some of the inner workings of the steam powered Case. Cover: Michael Dean Bradley and Gary Bradley pose by the hulking Case 150-HP Road Locomotive.

measuring 3 feet wide – would need to be fabricated. Finished, they would weigh three tons each. Parts would be painted, lettering and graphics would be applied. And thousands of hours would be spent breathing life into a machine not heard from since the 1920s.

In the age of railroads and horse-drawn power, the turn of the 20th century saw some innovative tractors that would transform the agriculture. The Case Road Locomotive had the potential to eclipse them all. Designed to move heavy loads where rail lines didn't exist, it was used to haul copper ore in New Mexico, and was used for jobs ranging from plowing beet fields, threshing and hauling stone from a quarry in states including Georgia, Kansas,

Kentucky, New York and Wisconsin.

The thing was built for power, if not speed. (In low gear, it crawled along at just over 2.5 miles an hour, while high speed doubled the pace, reaching more than 5.6 miles per hour.)

While the original machine sold for around \$4,000 in 1904 (roughly four times the cost of a 1904 Cadillac). The 2018 version will cost considerably more: an estimated \$1 million.

For more about the build, visit <https://www.facebook.com/Anderson-Industries-LLC-115448931876302/>

For more about the Threshing Show, go to <https://www.facebook.com/jvthreshers/> or <http://www.jamesvalleythreshers.com/>

Among those lending a hand to the project's build are Mark Knox, left, and Bob Johnson, second from right. Johnson is system support/member services manager at Codington-Clark Electric in Watertown.

June Board Meeting

The regular meeting of the board of directors of Lacreek Electric Association, Inc. was held in the office of the Cooperative, located in the town of Martin, S.D., June 19, 2018, beginning at 4 p.m.

Also present were General Manager Derek Sorley, Operations Manager Mike Pisha, Finance and Administration Manager Anna Haynes, Staff Assistant Sherry Bakley and Administration Assistant Stacey Robinson.

A motion was made, seconded and carried to accept the check audit committee's review of the list of May checks and disbursements. (Connie "chairman", Marion and Wade). The July Check Audit Committee will be (Dean "chairman", Neal and Brent).

Anna presented the May Analysis of Investments. The investments were reviewed by the board.

A motion was made, seconded and carried to approve the list of new members, attached hereto.

Anna reported that the office continues to be busy with summer disconnects; that the office has been in the field observing lineman at work and Document Vault is now live in IVUE and passed our security scan. In addition, the OST Energy Office received additional funds, which resulted in a huge increase of calls from our members to both offices.

Mike reported on the Wanblee Tap schedule of completion; about work in progress: Wanblee East rebuild-Wanblee East Taps Reinsulate-Thunder Valley Stakes for 2 Apartment Buildings and Community Building-Golden West Fiber Project-URD installs and on equipment.

The Transportation and Equipment committee recommended purchasing a new 4-wheeler. A motion was made, seconded and carried to approve the four-wheeler purchase. The committee asked the board to approve selling Old Bucket Truck #3 and place it on Big Iron to sell. A motion was made, seconded and carried to sell Truck #3 on Big Iron. In addition, will sell an old four-wheeler locally through advertisement.

The safety report was presented by Mike. General Manager Derek Sorley gave Member Services and Procurement Manager Josh Fanning's report as Josh was absent from the meeting. He reported that Josh is attending an ACLARA One conference June 19-20; about energy audits for members; he is meeting with Thunder Valley on Solar installation; about Irrigation load control; on the Transformer Blanket (CSP verses Conventional transformers) on the Pole, Office and Cleaning supplies blanket and about the cost to replace the Office Heat Pump.

Clarence and Donovan reported on the safety meeting they attended in house at Lacreek.

Derek reported on the SDREA Managers Meeting he attended; on the RESCO 2018 Director Election; that the SOP's (Standard Operating Procedures) have been completed for all departments; that there is a SDREA Leadership Conference July 30 in Pierre for the President and Vice President of the board and gave an update on upcoming events that include: Rushmore Board of Director Meeting in Rapid City June 21, Monthly Load Control Conference Calls, Basin Electric Power Cooperative Managers Meeting in Deadwood July 16-19 and the Rushmore Electric Power Cooperative Managers Meeting in Rapid City July 26.

Discussion was held on the NRECA Region IV meeting being held in Minneapolis, Minnesota, Sept. 17-19 with Derek being the delegate and no other board member planning to attend at this time.

Discussion was held on the conflict of interest disclosure form, which the board all signed. 3003103208

Anna reviewed the 990 form.

Discussion was held on the 2018 Glenn English Scholarship with the board deciding to not participate.

Discussion was held on the NRECA Senate Farm Bill.

Discussion was held on a letter of Concern to NRECA.

Discussion was held on Employee Policy #1 which was rewritten instructed by the

board. The rewritten Policy #1 (Per Diem) which was presented was rejected and instead asked that Employee Policy #1 be updated.

The board went into executive session at 6:39 p.m. and came out of executive session at 6:59 p.m.

Next Board Meeting – July 17, 2018 at 4 p.m.

IN CASE OF OUTAGE

1ST: Check the fuses or breakers in your home or building in which you do not have power.

2ND: Check meter for display and readings. If the meter is blank, you are probably experiencing an outage and need to call our office immediately.

3RD: If your meter has a display, check your breaker below your meter on the yard pole.

4TH: Please contact your neighbor to see if they are experiencing a power outage because it would be helpful to know if other members in the area are also out of power.

5TH: Make sure you have the name the bill is in, the meter number and/or the account number.

6TH: Call Lacreek Electric at 605-685-6581 or if you are calling long distance dial 1-800-655-9324. We now have a 24 hour answering service. First, you will hear an automated message, "Thank you for calling Lacreek Electric. Your call may be recorded or monitored for quality assurance." You will then hear the following menu:

- If you're calling to report an electrical outage, press 1.
- If you have a billing question, press 2.
- If you're calling to report a meter reading, press 3.
- For all other calls, press 0.

Office Hours: 7 a.m.-4:30 p.m.
MDT Open over noon hour. Closed Saturday, Sunday and holidays

STORMS POUND AREA

Hail, Tornado and Lightning Leave Damage in Wake

Stacey Robinson

stacey@lacreek.com

Lacreek Electric's members experienced damaging storms the weekend of July 27-29. The surrounding areas of Oglala experienced major hail damage, which resulted in members' homes being extensively damaged along with Lacreek's equipment being damaged.

A Lacreek Electric meter was destroyed by hail during the July 27-29 storm.

There was lightning damage in the Allen and Kyle area.

A tornado touched down near American Horse Creek road resulting in a member's home being demolished and a transmission pole was snapped off south of the Kyle Substation.

The linemen worked around the clock diligently to restore power to our members. We want to offer our sympathy to the people affected by these devastating storms.

Above: Hail damage destroyed cars. Right: Four hail stones gathered from the storm fit in a man's hands. Photos by Peter Hill

Power in Preparation

Co-ops Committed to Preparedness Every Day

Derrill Holly

NRECA

Preparation is the key to success in many things we do in life. Planning, practice and thoughtful assessment provide opportunities to work out potential problems in advance.

September is National Preparedness Month, and the Department of Homeland Security's Federal Emergency Management Agency is encouraging all of us to prepare for emergencies. But most of us do better when we prepare for the routine, the extraordinary and the unexpected.

For electric cooperatives in South Dakota and western Minnesota, preparation plays a huge role in ensuring that our members have the electricity they need as soon as they flip a light switch or start an appliance.

When a co-op crew pulls a truck into a loading bay, warehouse workers have already pulled the parts and equipment needed for that crew's scheduled day's work. When a member services representative discusses balanced billing by telephone, they're helping a member with preparations to ease the impact of seasonal high bills.

When meteorologists call for exceptionally hot or cold weather, electric co-ops work closely with their generation and transmission cooperatives (G&Ts) to ensure adequate supplies of electricity are reserved to meet anticipated demand.

South Dakota and western Minnesota electric co-ops are constantly preparing for the future. Engineers and construction crews design, build and upgrade the electric system to move electricity from

Be Prepared Before the Storm

Here are some basic items you should store in your home in case of emergency:

-  **Water:** Three day supply, one gallon per person per day
-  **Food:** Three day supply, non-perishable, high-energy
-  **Clothing, bedding, and sanitation supplies**
-  **Tools:** Can opener, plates, utensils, flashlight, batteries, cash, bleach, hand sanitizer
-  **First aid supplies, medicine**
-  **Important documents**

Visit redcross.org/domore to learn more about disaster kits.

power plants and substations to farms, homes and businesses.

All of these actions prepare electric co-ops to deal with the daily challenges of meeting the electricity needs of their members. But working together, we put in just as much effort preparing for the uncertainties posed by flooding, tornadoes, wildfires, high winds, blizzards and ice storms. Electric co-ops maintain and constantly update emergency response plans. Employees train for major events and know in advance what their primary and secondary roles would be. Electric co-ops also subscribe to mutual aid agreements. That's why you see trucks and crews from co-ops in other states in your communities when major power outages occur.

We also work with state and national

officials to help ensure that crews can get to your communities when they are needed and have the lodging, food and support necessary to work effectively far from home.

September may be National Preparedness Month, but the region's electric cooperatives are committed to preparedness every day – for the routine, the extraordinary and the unexpected.

Derrill Holly writes on consumer and cooperative affairs for the National Rural Electric Cooperative Association, the national trade association representing more than 900 local electric cooperatives. From growing suburbs to remote farming communities, electric co-ops serve as engines of economic development for 42 million Americans across 56 percent of the nation's landscape.

Are You Ready?

The heat of August and September make it hard to remember that winter snows will be here before we know it.

The South Dakota Office of Emergency Management offers the following preparedness tips:

Winter storms, especially blizzards, can be very dangerous. Preparing before extremely cold, snowy weather occurs can save your life. Know what winter storm watches and warnings mean. If a Winter Storm Watch has been issued for your area, hazardous winter weather conditions (such as snow greater than 6 inches in 24 hours, winds gusting over 35 mph, or visibilities less than a 1/4 mile) are expected in the next 12 to 36 hours. A Winter Storm Warning means the conditions listed for the Watch exist.

Try to stay indoors during a blizzard. If you have to go outside to check on animals or for another reason, be sure to dress warmly in loose fitting layers of clothing.

Wear heavy gloves to protect your hands and heavy socks with boots that will not absorb water. Cover your mouth so that you don't breathe in freezing cold air that can damage your lungs. Keep your body dry.

Know the signs of hypothermia or frostbite.

If you are traveling at all when a winter storm is possible, then you should always bring emergency supplies with you. You can never predict when you might get stranded and need them. If stranded, make sure you stay in your vehicle. Run your vehicle about 10 minutes every hour. Open windows a little for fresh air to avoid carbon monoxide poisoning. Make yourself visible to rescuers by turning on the dome light at night, tie a colored cloth to your antenna, and raise the hood after the snow stops falling.

If you are caught outside, find a dry shelter and cover all exposed parts of the body. If shelter is not available, prepare a lean-to, wind break, or snow-cave for protection from the wind.

Build a fire for heat and to attract attention. Place rocks around the fire to absorb and reflect heat. Do not eat snow, it will lower your body temperature. Melt it first.

Weather related dangers can be very unexpected. Being prepared for a potential hazardous situation could save your life.

Supply Kit

Prepare your family for any disaster by putting together an emergency supply kit. Make sure your kit is always ready, easily accessible and stored in a durable container.

Recommended Kit Supplies

- Water, one gallon per person per day for drinking and sanitation
- Food, at least a three-day supply of non-perishable food
- Battery-powered radio and extra batteries
- Flashlight and extra batteries
- First aid kit
- Whistle to signal for help
- Dust mask or cotton t-shirt to help filter the air
- Moist towelettes for sanitation
- Wrench or pliers
- Can opener for food
- Plastic sheeting and duct tape
- Unique family needs, such as daily prescriptions, infant formula or diapers, and copies of important family documents
- Garbage bags and plastic ties for personal sanitation

Other Items to Include

- Change of clothing
- Sleeping bag or blanket
- Hat, mitten, scarf
- Waterproof matches
- Toys, books, puzzles, games
- Extra house and car keys
- List of contact names and numbers
- Sturdy shoes
- Gloves for clearing debris
- Tent
- Fuel for cooking
- Plastic knives, forks, spoons
- Paper plates and cups
- Paper towels
- Heavy-duty aluminum foil
- Hand sanitizer
- Bar soap and liquid detergent
- Shampoo
- Toothpaste and toothbrushes
- Feminine supplies
- Toilet paper
- Household bleach with no additives
- Newspaper to wrap garbage and waste
- Ax, shovel, broom
- Screwdriver, hammer
- Coil of one-half inch rope
- Knife or razor blades
- Garden hose for siphoning and fire fighting

It can be tough to help kids understand the importance of saving energy.

Electrifying Ways to Help Kids Be **SMART ENERGY USERS**

“Did you turn off the lights in your room?”

“We’re not paying to heat the whole neighborhood!”

“Save some hot water for the rest of us!”

Across America, parents utter these phrases to their children countless times each day. Despite their best efforts, it can be tough to help kids understand the importance of saving energy – and to put that knowledge into action.

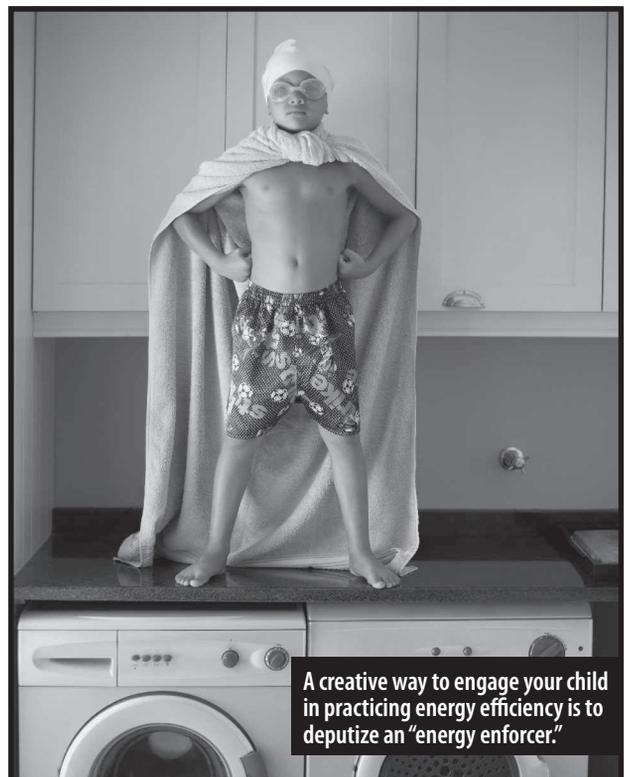

Few people have more experience talking about energy efficiency than the communication professionals who work at America’s electric cooperatives. So we asked them how they persuade the toughest audience they face every day: their kids. Here are a few of their tips.

Deputize an “energy enforcer”

Several parents recommended deputizing children to investigate wasteful energy practices.

When her children were young, Heidi Smith of Tideland Electric Membership Corporation in North Carolina let them take turns playing the role of energy deputy.

Each week, the appointed child was given a badge and empowered to seek out energy waste and hold the offending

A creative way to engage your child in practicing energy efficiency is to deputize an “energy enforcer.”

party accountable.

“My youngest son took it so seriously that he once cracked open the bathroom door and reached in to turn off the light on his dad after he decided daddy had been in there long enough,” Smith said. “All five of my children are now grown, but they continue to practice energy efficiency in their own lives.”

Diana Hersch of Hancock-Wood Electric Cooperative in Ohio offered a slightly different twist on the same idea. She suggests offering your little energy deputies a bounty for finding leaks, drafts and other wasteful energy practices around the house.

Their progress can be tracked with stickers on a calendar, and when the kids reach their goal, they can be rewarded with a sheriff’s badge or another small toy of their choice.

Penalty stroke

In addition to teaching her patience and discipline, the rounds of golf Jim Nimmo plays with his 11-year-old-daughter have turned into valuable lessons in energy conservation.

When the kids reach their goal, they can be rewarded with a sheriff’s badge or another small toy of their choice.

Nimmo, of Farmers Electric Cooperative in Texas, has started adding a penalty stroke to his daughter’s score for each time he’s had to turn off her bedroom light and fan since their last round.

“It gives new meaning to the term penalty stroke,” Nimmo said. “We don’t have much of a problem anymore.” No word on whether his daughter is allowed to return the favor.

The invisible hand

If your child’s hand never seems to find its way to the light switch, perhaps the invisible hand of the free market can help them out.

Katie Kothmann Haby of Medina Electric

Cooperative in Texas said her dad used to fine her 25 cents for every light bulb she and her siblings left on in their rooms. For her ceiling fan with four bulbs, that was a costly mistake.

“It taught us that electricity really did cost money since we had to pay when we didn’t conserve it,” Haby said. Though her daughter is very young, Haby says she plans to use the same approach when she’s older.

Game Theory

Other creative strategies to inspire kids to do their chores and keep peace in the home can be found in *The Game Theorist’s Guide to Parenting*. The recently published book, written by Paul Raeburn and Kevin Zollman, shows how Game Theory can be applied to many of daily transactions of parenting, such as sharing, dividing, collaborating and compromising.

No matter what the approach, talking to kids about energy use is sure to pay dividends. They might not always follow through, but they’ll be learning important lessons about the value of energy and the importance of conservation that can last a lifetime.

Other creative strategies to inspire kids to do their chores and keep peace in the home can be found in *The Game Theorist’s Guide to Parenting*.
