## Could You Use a \$160 Bill Credit?

### Simply Find Your Account Number

A member's account number has been hidden somewhere in this newsletter. If you find your account number, call the office before Oct. 5 and you will receive a **\$160 credit** on your next month's billing. If no one finds their account number, the credit will be \$170 in the next issue.

### Energy Efficiency Tip of the Month

Cooler weather is on the way! Heating requires more energy than any other system in your home, typically making up about 42 percent of your energy bill. With proper equipment maintenance and upgrades like additional insulation and air sealing, you can save about 30 percent on your energy bill.

October is National Co-op Month.

### Types of Co-ops:

Agriculture    Credit Unions  
 Energy        Grocery/Food  
 Healthcare    **And more!**  
 Housing

October is National Co-op Month.

### Defined by Principles:

1. Voluntary & Open Membership
2. Democratic Control
3. Members' Economic Participation
4. Autonomy & Independence
5. Education, Training & Information
6. Cooperation Among Cooperatives
7. Concern for Community.

October is National Co-op Month.

Electric cooperatives are led by the community, for the community.

# Lacreek Electric Cooperative Connections

(USPS No. 018-912)

## Board of Directors

Clarence Allen - President  
Wade Risse - Vice President  
Brent Ireland - Secretary  
Troy Kuxhaus - Treasurer  
Melvin Cummings - Scott Larson -  
Neal Livermont - Dean O'Neill -  
Tom Schlack - Marion Schultz -  
Jerry Sharp - Connie Whirlwind  
Horse - Donovan Young Man

## Management Staff

Josh Fanning -  
Interim General Manager  
Sherry Bakley -  
Work Order and Billing Manager  
Anna Haynes -  
Finance and Benefits Manager  
Mike Pisha - Operations Manager  
Stacey Robinson - Member Service  
Representative Manager and Editor

## Office Personnel

Cody Larson - Warehouse Man

## This institution is an equal opportunity provider and employer.

This publication is mailed the 15th of the month prior to the issue date. Layout is at least three weeks prior to mailing. LACREEK ELECTRIC COOPERATIVE CONNECTIONS is published monthly by Lacreek Electric Association, Inc., PO Box 220, Martin, SD 57551 for its members. Families subscribe to Lacreek Electric Cooperative Connections as part of their electric cooperative membership.

Subscription information: Electric cooperative members devote 50 cents from their monthly electric payments for a subscription. Nonmember subscriptions are available for \$12 annually. Periodicals Postage Paid at Martin, SD and at additional mailing offices.

POSTMASTER: Send address changes to: Lacreek Electric Cooperative Connections, PO Box 220, Martin, SD 57551; telephone (605) 685-6581; fax (605) 685-6957

Jessica Cook is one of two billing specialists at the cooperative.

## At Your Service

Jessica Cook has been with Lacreek for five years and is currently a Billing Specialist. Jessica is originally from Pine Bluffs, Wyoming, however, she relocated to Martin with her husband, Cash, who ranches southeast of Martin. They have two little boys, Vernon and Clancy. Jessica is a talented artist who enjoys painting in her free time and she is also a master gardener. Being a mom keeps Jessica busy and also helping her husband, Cash, ranch.

Terri Gregg has been with Lacreek 16 years and is currently a Billing Specialist. She is a lifetime resident of Martin. She is married to Jon Gregg and they have two sons, Jesse and Dylan. Terri and her family have been involved with ranching her whole life. Terri enjoys beading and there is no one she meets that does not go away like they have met a friend.

Terri Gregg is one of two billing specialists at the cooperative and has been with LEA 16 years.

## October is Fire Prevention Month

The U.S. Fire Administration reports that fires kill more than 4,000 Americans each year and approximately injure 20,000 more. U.S. fire departments respond to nearly 2 million fires each year, with three-quarters of them occurring in residences.

A home is often referred to as a safe haven. This month, make sure your home is protected from (and your family is prepared for) a fire. Here are 10 simple tips to help you avoid fires and reduce the risk of injury should one occur:

- **Smoke Alarms** – Smoke alarms are widely available and inexpensive. Install a smoke alarm on every level of your home and test it monthly.
- **Prevent Electrical Fires** – Don't overload circuits or extension cords. Cords and wires should never be placed under rugs or in high traffic areas. Avoid loose electrical connections by checking the fit of the plug in the wall outlet. If the plug loosely fits, inspect the outlet right away. A poor connection between the plug and the outlet can cause overheating and can start a fire in minutes.
- **Keep Plugs Safe** – Unplug all appliances when not in use. Follow the manufacturer's safety precautions and use your senses to spot any potential disasters. If a plug is overheating, smells strange, shorts out or sparks – the appliance should be shut off immediately, then replaced or repaired.
- **Alternate Heaters** – Make sure there is ample space around any portable heating unit. Anything that could catch fire should be at least three feet away. Inspect your chimney annually and use fire screens to help keep any fires in the fireplace.
- **Fire Safety Sprinklers** – When combined with working smoke alarms, home fire sprinklers greatly increase your chance of surviving a fire.
- **Create An Escape Route** – Create and practice your escape plan with your family from every room in the house. Practice staying low to the floor and checking for hot doors using the back of your hand.
- **Position Appliances Carefully** – Try to keep TV sets, kitchen and other appliances away from windows with curtains. If there is a wiring problem, curtains can spread a fire quickly. Additionally, keeping your appliances away from water sources (like rain coming in from windows) can help prevent wiring damage which can lead to a fire.
- **Clean Dryer Vents** – Clothes dryers often start fires in residential areas. Clean the lint filter every time you start a load of clothes to dry or after the drying cycle is complete. Make sure your exhaust duct is made of metal tubing and not plastic or foil. Clean the exhaust duct with a good quality dryer vent brush to prevent blockage and check for lint build up behind the dryer at least twice a year.
- **Be Careful Around the Holidays** – If you fill your home with lights during the holiday season, keep them away from anything that can easily catch fire. Check all of your lights prior to stringing them up and dispose of anything with frayed or exposed wires.
- **Conduct Regular Inspections** – Check all of your electronic equipment and wiring at least once a month.

Following these simple tips could potentially save your life or the life of a loved one. Pass this list on to your friends and family and make this fire prevention month count!

Co-op Month.

## KIDS CORNER SAFETY POSTER

**"Be careful of snow cavities over electrical boxes."**

**Avery Bauman, 10 years old**

Avery is the daughter of Pete and Bridget Bauman, Watertown, S.D. They are members of Codington-Clark Electric Cooperative, Watertown.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

# Perfect Pasta

## Angel Hair Pasta with Italian Sausage and Herbs

- |   |   |
|---|---|
| 1 lb. angel hair pasta                              | 1 tsp. McCormick Gourmet™ Parsley, Flat Leaf      |
| 1 lb. sweet Italian sausage, casing removed         | 1/2 tsp. McCormick Gourmet™ Organic Garlic Powder |
| 2 T. olive oil                                      | 1/2 tsp. McCormick Gourmet™ Organic Fennel Seed   |
| 1-1/2 cups chopped red onion                        | 1/2 tsp. Sicilian sea salt                        |
| 8 oz. mushrooms, quartered                          | 1/2 cup grated Romano cheese                      |
| 1 tsp. McCormick Gourmet™ Organic Basil             |   |
| 1 tsp. McCormick Gourmet™ Organic Italian Seasoning |   |

Cook pasta as directed on package. Drain well. Meanwhile, break up sausage in large skillet. Cook on medium-high heat 5 to 6 minutes. Remove sausage; drain fat. Rinse skillet and wipe clean. Heat oil in same skillet on medium heat. Add onions, mushrooms and seasonings; cook and stir 5 minutes. Add cooked sausage; cook and stir 5 minutes longer. Place pasta in large serving bowl. Add sausage mixture and cheese; toss to coat well. Serve with additional cheese, if desired. Makes 12 (1 cup) servings.

**Pictured, Cooperative Connections**

## Taco Pasta Salad

- |  |  |
|--|--|
| 1-1/2 lbs. ground beef, cooked and drained               | 1 pint grape tomatoes, sliced in half      |
| 4 T. taco seasoning                                      | 3 cups shredded lettuce                    |
| 1 lb. rotini, cooked, drained and rinsed with cold water | 2 cups shredded cheese                     |
| 1/2 small onion, minced (optional)                       | 1 bottle Catalina dressing                 |
|  | 1 bag nacho cheese tortilla chips, crushed |

Stir together hamburger and taco seasoning. In a large bowl, combine hamburger, pasta, onions, tomatoes, lettuce and cheese. Mix in dressing. Stir in chips. Serve immediately.

**Dawn Leibel, Glencross, SD**

## Smoky BBQ Chicken Salad

- |  |  |
|--|--|
| 1 box Betty Crocker™ Suddenly Salad® Ranch and Bacon Pasta Salad Mix | 1/4 cup barbecue sauce                 |
| 1/2 cup frozen corn  | 1 cup cherry or grape tomatoes, halved |
| 1/4 cup mayonnaise   | 12 butter lettuce leaves, optional     |
| 2 cups shredded rotisserie chicken                                   | 1/4 cup chopped green onions           |

Empty pasta mix into a 3-quart saucepan 2/3 full of boiling water. Gently boil uncovered 12 minutes, stirring occasionally, adding corn during last 2 minutes of cooking. Drain pasta and corn; rinse with cold water. Shake to drain well. In large bowl, stir together seasoning mix, mayonnaise and barbecue sauce. Stir in pasta, corn, chicken and tomatoes. Line serving plate with lettuce leaves. Top with salad mixture; sprinkle with green onions. Serve immediately or cover and refrigerate 1 hour to chill.

**Jean Osterman, Wheaton, MN**

## Cheating Cheeseburger Macaroni

- |                                       |                                     |
|---------------------------------------|-------------------------------------|
| 1-1/2 lbs. ground beef                | 1 can cheddar cheese soup           |
| 1/4 cup chopped onion                 | 1 cup water                         |
| 1/2 pkg. baby carrots, finely chopped | 1/4 cup sour cream, optional        |
| 1 can cream of chicken soup           | 2 cups macaroni, cooked and drained |

Cook ground beef and onion; drain. Add carrots and cook while macaroni is cooking. Mix soups, water and sour cream; add to hamburger. Simmer over medium heat for a few minutes. Stir in pasta. Serve immediately.

**Becki Hauser, Tripp, SD**

Please send your favorite slow cooker, holiday or soup recipes to your local electric cooperative (address found on Page 3).

Each recipe printed will be entered into a drawing for a prize in December 2019.

All entries must include your name, mailing address, telephone number and cooperative name.

# Is a Heat Pump Right for My Home?

Pat Keegan

Collaborative Efficiency

**Dear Pat:** My cousin just installed a heat pump, so now she uses fan units placed on the walls instead of her baseboard heaters. My neighbors just got a heat pump too, but they replaced their furnace and air conditioner, so it blows through the old furnace vents. Could one of these options work for my home as well? – Anke

**Dear Anke:** The short answer is yes. The two most common types of heat pumps, which you've just described, are often good options.

It sounds like your cousin replaced her electric baseboard heaters with a ductless mini-split heat pump. This is a good solution because older baseboard heaters are typically inefficient. The mini-split system has a compressor outside that is connected with refrigerant lines to the blowers inside. A ductless system can serve up to four zones, so it can heat a small home or can be used in combination with another heating system in a larger home. The ductless mini-split system is a great option for a home that does not have a duct system, or if the existing duct system is inefficient or poorly designed.

Your neighbors most likely replaced their central heating and air conditioning (HVAC) system with a central system air-source heat pump. This system's compressor is also located outside, but in this case, it's connected to the home's duct system to distribute cold or warm air through the existing vents. The central system heat pump can be an efficient option if your existing duct system is in good shape.

A less common type of heat pump is a ground-source, or geothermal, system that taps into heat that's naturally underground year-round. Geothermal systems are typically an expensive investment, but they are quite efficient.

Heat pumps are typically much more efficient than electric resistance systems and can be a solid solution in a wide variety of circumstances. They can be the right choice in a manufactured home, a construction addition or as a replacement for a broken or inefficient HVAC system. They're also becoming more popular for central heating in new construction.

**Here's how heat pumps work:** During winter, they pull warmth from the outside air into the home; during summer, the process is reversed and warmth from inside the home is exhausted outside. It may seem odd that warmth can be found in outdoor winter air, but heat pumps are amazing inventions. They've become much more efficient in recent years to the point that they can be effective year-round in most cold winter climates.

**The efficiency of a heat pump is measured in two ways:** The HSPF (Heating Season Performance Factor) rating measures heating efficiency and the SEER (Seasonal Energy Efficiency Ratio) rating measures cooling efficiency. The minimum ratings for a heat pump are HSPF 8.2 and SEER 14. Heat pumps with the ENERGY STAR® rating are significantly more efficient than the minimum standard.

**Here's how to know if you should consider a heat pump for your home:**

- 1. Want to save money?** If you are currently heating your home with electric resistance or propane or heating oil and you seal air leaks and install additional insulation, installing an efficient heat pump could reduce your heating costs by up to 75 percent. And if you are currently cooling your home with an old A/C system or window A/C units, you could also cut your cooling costs.
- 2. Want heating and cooling flexibility?** A ductless mini-split heat pump can serve up to four individual zones or rooms and each room's temperature can be controlled separately.
- 3. Want safer heat?** Heat pumps eliminate the need to burn fuels inside your home and exhaust combustion gases. There's no risk of carbon monoxide or gas leaks that can come from flaws in a system that runs on natural gas, propane, fuel oil or wood.

Before you consider installing any new heating and cooling system for your home, I strongly suggest you conduct an energy audit. Your electric co-op may provide energy audits or be able to recommend a local professional.

As with any major home improvements or installations, be sure to get a few quotes and references before committing or making any payments.

**Heat pumps are typically much more efficient than electric resistance systems and can be a solid solution in a wide variety of circumstances.**

## State Veterans Cemetery Breaks Ground

Construction on the new South Dakota State Veterans Cemetery near Sioux Falls got underway this fall with an official groundbreaking Sept. 9.

The cemetery will be located on 13 acres of land, located just north of the I-229 and I-90 interchange off of Split Up Creek Road and 477th Ave.

Lt. Gov. Larry Rhoden, sixth from left, and Gov. Kristi Noem, were among officials who broke ground for the new state veteran's cemetery near Sioux Falls.

And, just days ahead of the groundbreaking, South Dakota's electric cooperatives were able to contribute \$47,500 to the project.

In August, The South Dakota Department of

Veterans Affairs was awarded a \$6.9 million grant from the United States Department of Veterans Affairs (VA) National Cemetery Administration for the establishment of South Dakota State Veterans Cemetery in Sioux Falls.

"This new cemetery will give tens of thousands of Veterans and their families the peace of mind that comes from knowing they will have a burial option close to home," said Under Secretary for Memorial Affairs Randy Reeves in announcing the grant.

This grant will fund the construction of 610 pre-placed crypts, 999 cremains gravesites, 660 columbarium niches, 50 memorial wall markers, a main entrance, an avenue of flags, an administration building, a maintenance facility, roads, an assembly area, a committal shelter, scatter burial area, a memorial walkway, landscaping and supporting infrastructure. The project will develop approximately 12.9 acres and will enable the cemetery to serve approximately 43,000 Veterans, their spouses and eligible family members. The VA Veterans Cemetery Grants Program (VCGP) complements the 136 VA national cemeteries across the country. Since its inception 41 years ago, the VCGP has awarded grants totaling more than \$817 million to establish, expand, improve or operate and maintain 115 state and tribal Veterans cemeteries. These VA-funded cemeteries provided more than 39,000 burials in 2018.

## Ribbon Cutting Held

A ribbon cutting ceremony was held for the new Onida, S.D., substation on Aug. 23. The substation is owned by East River Electric Power Cooperative and serves the member-owners of Oahe Electric Cooperative, including the city of Onida and Ringneck Energy ethanol plant.

During the event, representatives from East River Electric, Oahe Electric, Ringneck Energy, the Onida Area Development Corporation and the Onida Chamber of Commerce discussed the benefits that the new substation brings to the area. The event concluded with a ribbon cutting ceremony.

"We are excited for the enhanced capabilities of this new facility in meeting the growing energy needs of Onida, Ringneck Energy and the surrounding area," said East River Chief Operations Officer Mark Hoffman. "This new substation will have the ability to serve new growth in the area for years to come, just further enhancing the region's economic development opportunities. East River and Oahe Electric are strong supporters of the ethanol industry and are pleased to work with Ringneck Energy to meet their power needs."

The new substation replaces a substation that was built in the 1970s and brings increased capacity to reliably meet the area's current and future energy needs. Construction began in September 2016 and was completed in fall 2018.

"We appreciate the great working relationships with East River Electric, Ringneck Energy and the City of Onida," said Oahe Electric General Manager Rodney Haag. "This new substation has improved the reliability of Oahe Electric's energy delivery system to our member-owners."

In addition to the Onida substation, East River Electric is currently planning several other facilities in the area. These facilities include a new substation west of Blunt in Hughes County that is currently under construction, plans for a new substation north of Pierre and a rebuild of a current substation west of Onida. These projects will improve reliability and provide additional capacity for the region's growing energy needs.

East River Electric Business Development Director Mike Jaspers (left), East River Electric Chief Member and Public Relations Officer Chris Studer, East River Electric Chief Operations Officer Mark Hoffman, Oahe Electric General Manager Rodney Haag, Onida Chamber of Commerce President Marileen Tilberg, Onida Area Development Corporation President Brian Ring, Onida Chamber of Commerce Member Leann Weischedel, Ringneck Energy CEO Walt Wendland and Oahe Electric Board President Ken Gillaspie participate in the ribbon cutting for the new substation.

Renville-Sibley Co-op Power Association Journeyman Lineman Clint Olson is a member of the Olivia Area Technical Rescue Team. Olson is in the center front holding the dalmation dog.

# HELPING OUT AT NEW HEIGHTS AND TIGHT SPACES

## Co-op Employees Among Local Emergency Responders

**Brenda Kleinjan**

editor@sdrea.coop

As the chief of the Olivia, Minn., Area Technical Response Team, Renville-Sibley Co-op Power Association journeyman lineman Clint Olson combines some of his experience with the Danube, Minn.-based cooperative with his 15 years as a member of the Olivia Fire Department.

Olson joined the OFD after being asked repeatedly by then-members of the volunteer fire department.

“To be honest, the main reason for joining the OFD was so I wouldn’t be bugged anymore by past firemen asking me to join every time I saw them in public. Looking back, I am glad I did,” Olson said.

Olson was tapped to lead the newly formed rescue team which was established in January 2019. The team is specialized in high-angle and low-angle (confined space) rescues.

The team is made up of firemen all from different towns in

Many rural and small town fire departments throughout the Dakotas and western Minnesota rely on volunteers to fill the ranks of the much-needed service.

Renville County, Minn. The county is home of several large ag industries, such as the Southern Minnesota Sugar Beet Cooperative and several large seed plants along with large bin set ups.

“We saw a need for the Technical Response Team years ago and never could spark enough interest from the other towns in the county for funding. Finally, Olivia stepped up and funded the start up,” said Olson. “We firemen have trained in the past with some high-angle rescue trainings but knew it wasn’t proper and knew it’s a need being in a rural community.”

Right after the team was established, the first call came in of a conscious victim who fell 40 feet down into a concrete seed bin.

“There was no access from the bottom. After assessing the situation, we were able to get the victim up using ropes and mechanical advantage systems which consists of pulleys and anchor points through a small four foot by four foot access door. From there, we were able to rig a rope system on the catwalk outside in order to lower the victim to the ground 75 feet below,” Olson said.

“Looking back, this is the first rescue like this in our area and we are glad we had the

training and equipment to complete the task,” Olson said.

There are multiple regular trainings and extra trainings that go along with the fire department and the Olivia Area Technical

**“Being in a smaller agriculture and rural community, fire departments in our area are struggling to fill positions, whether its lack of interest or time.”**

rescue team, Olson said. The fire department trains twice a month while the OATRT team trains once a month.

Olson notes there is a need for more volunteers in fire departments and ambulance crews.

“Being in a smaller agriculture and rural community, fire departments in our area, are struggling to fill positions, whether its lack of interest or time,” Olson said.

To try to maximize departments’ effectiveness, departments have been training with our surrounding departments and assisting in mutual aid calls.

“I highly recommend if you can join a local EMS in your community the benefits are self-rewarding. The knowledge you learn can be beneficial for you to share with your coworkers also no matter what field you are in.”

The knowledge base that co-op linemen bring to a volunteer fire department can be beneficial, Olson noted, especially when it comes to electrical hazard recognition.

“Multiple trainings have been done internally with our department on what action to take if a live wire is involved and also know where the disconnects are located and types of disconnects need to be opened in order to isolate before the utility company arrives,” Olson said.

Olson is one of three employees of Renville-Sibley who are members of their fire department or technical team. Fellow journeymen linemen Brayden Fischer and Brandon Ochs are volunteer firefighters

“I describe it has a brotherhood similar as a brotherhood at your electric cooperative,” Olson said.

RSCPA Journeyman Lineman Brayden Fischer is in the back row, fourth from right, while Journeyman Lineman Clint Olson is second from the left in the first row. Not pictured is Journeyman Lineman Brandon Ochs.

# BOARD ROOM

## July 2019 Board Meeting

The regular meeting of the Board of Directors of Lacreek Electric Association, Inc. was held in the office of the Cooperative, located in the Town of Martin, South Dakota, July 23, 2019, beginning at 4 p.m.

The meeting was called to order by President Allen and the following directors were present: Tom Schlack, Troy Kuxhaus, Brent Ireland, Wade Risse, Connie Whirlwind Horse, Jerry Sharp, Scott Larson, Marion Schultz, Melvin Cummings and Donovan Young Man. Absent were Dean O'Neill and Neal Livermont. Also present were Line Foreman Jesse Byerley, Interim General Manager/Member Services and Procurement Manager Josh Fanning, Finance and Benefits Manager Anna Haynes, Member Services Representative Manager Stacey Robinson and Work Order and Billing Manager Sherry Bakley

A motion was made, seconded and carried to have Member Service Representative Manager Stacey Robinson record the board minutes.

A motion was made, seconded and carried to approve the June 2019 minutes.

There were no additions to the agenda.

A motion was made, seconded and carried to approve the Operating Report for May and the List of Disbursements for June that was presented by Finance and Benefits Manager Anna Haynes.

A motion was made, seconded and carried to approve the checks and disbursements for June. (Connie "chairman" Jerry and Marion) The July 2019 Check Audit Committee will be (Tom "chairman", Dean and Neal).

A motion was made, seconded and carried to approve the June Analysis of Investments which presented by Finance and Benefits Manager Anna Haynes.

A motion was made, seconded and carried to approve the list of new members, attached hereto.

Sherry reported that the billing has begun utilized the mass disconnect which has caused the office to be very busy and NISC wants to have us pilot test a new billing procedure.

Stacey explained the Credentialed Cooperative Director (CCD) program; asked if someone would like to take Wade's place at the Board Leadership Conference as he will be unable to attend; however, no one will be replacing Wade at the conference. In addition, everyone in the office has been very busy answering the phone due to disconnects.

Jesse reported that the line crew has been working a lot of overtime, due to outages caused by storms; on July 13 a high side fuse at the Niobrara Sub blew causing brown out conditions for some members which still remains a mystery; on work in

progress and about equipment repairs.

The safety report was presented by Jesse. Donovan reported on the SDREA board meeting he attended.

Tom reported on the Rushmore Electric board meeting he attended.

Brent and Clarence reported on the CFC Leadership Workshop they attended.

Josh reported the roof and AC replacement has been done; about the NERC meeting he attended at Rushmore; on the SDREA Manager's meeting he attended; on the CFC Training he attended in Pierre; on his upcoming NREA Board meeting in August and asked the board permission to attend the non-accountant meeting being held for a week in San Antonio Texas in October which the board agreed would be a good training for him to attend.

A motion was made, seconded and approved to have CFC provide a rate study which is a free service they offer.

Discussion was held on the Basin Electric Annual Meeting with Marion being the delegate and Clarence being the alternate. Josh, Troy, Wade and Scott plan to attend at this time.

Discussion was held on the CFC KRTA.

The board went into executive session from 6:26 p.m.-6:28 p.m.

Next board meeting – Aug. 20, 2019 at 4 p.m.

# IN CASE OF OUTAGE

**1ST:** Check the fuses or breakers in your home or building in which you do not have power.

**2ND:** Check meter for display and readings. If the meter is blank, you are probably experiencing an outage and need to call our office immediately.

**3RD:** If your meter has a display, check your breaker below your meter on the yard pole.

**4TH:** Please contact your neighbor to see if they are experiencing a power outage because it would be helpful to know if other members in the area are also out of power.

**5TH:** Make sure you have the name the bill is in, the meter number and/or the account number.

**6TH:** Call Lacreek Electric at 605-685-6581 or if you are calling long distance dial 1-800-655-9324. We now have a 24 hour answering service. First, you will hear an automated message, "Thank you for calling Lacreek Electric. Your call may be recorded or monitored for quality assurance." You will then hear the following menu:

- If you're calling to report an electrical outage, press 1.
- If you have a billing question, press 2.
- If you're calling to report a meter reading, press 3.
- For all other calls, press 0.

**Office Hours:**  
7 a.m.-4:30 p.m. MDT  
Open over noon hour  
Closed Saturday, Sunday and holidays

October is National  
Co-op Month.

Our goal is to efficiently deliver affordable, reliable and safe energy. Because we know you're counting on us.

October is National  
Co-op Month.

# Your Unique Source of Power

Paul Wesslund

NRECA

**Electric cooperatives belong to the people they serve – that would be you and your neighbors.**

You have a unique story to tell about yourself because you are part of an electric cooperative community. But if you're like a lot of electric co-op members, you might not feel you know enough to tell that story well. So, here's some help.

About one in 10 Americans receives their power the way you do, from an electric co-op. Electric co-ops belong to the people they serve – that would be you and your neighbors. Electric co-ops were first developed in the 1930s because city utilities, owned by investors wanting to make a profit, ignored rural America – they didn't think there was enough money to be earned there. So, people in rural communities met with each other and formed their own local electric co-ops.

October is National Co-op Month, the time of year when cooperatives across the country celebrate the many ways co-ops are unique and more importantly, the members they serve. This year, we're focusing on our ties to the local community. Your co-op was built by the community, for the community, so let's take a look at what that means for you, the members of the co-op.

**Your co-op is here to stay.** Since the co-op belongs to the members it serves with safe, reliable, affordable energy, it's not going to move out of the country, or even across the state. It's staying right where it is.

**Your co-op knows you.** No two co-ops are alike. Across the country, there are more than 900 electric co-ops. Because each of those co-ops belongs to the people who live there, the co-op listens to the community they are a part of. Whether it's

October is National Co-op Month.

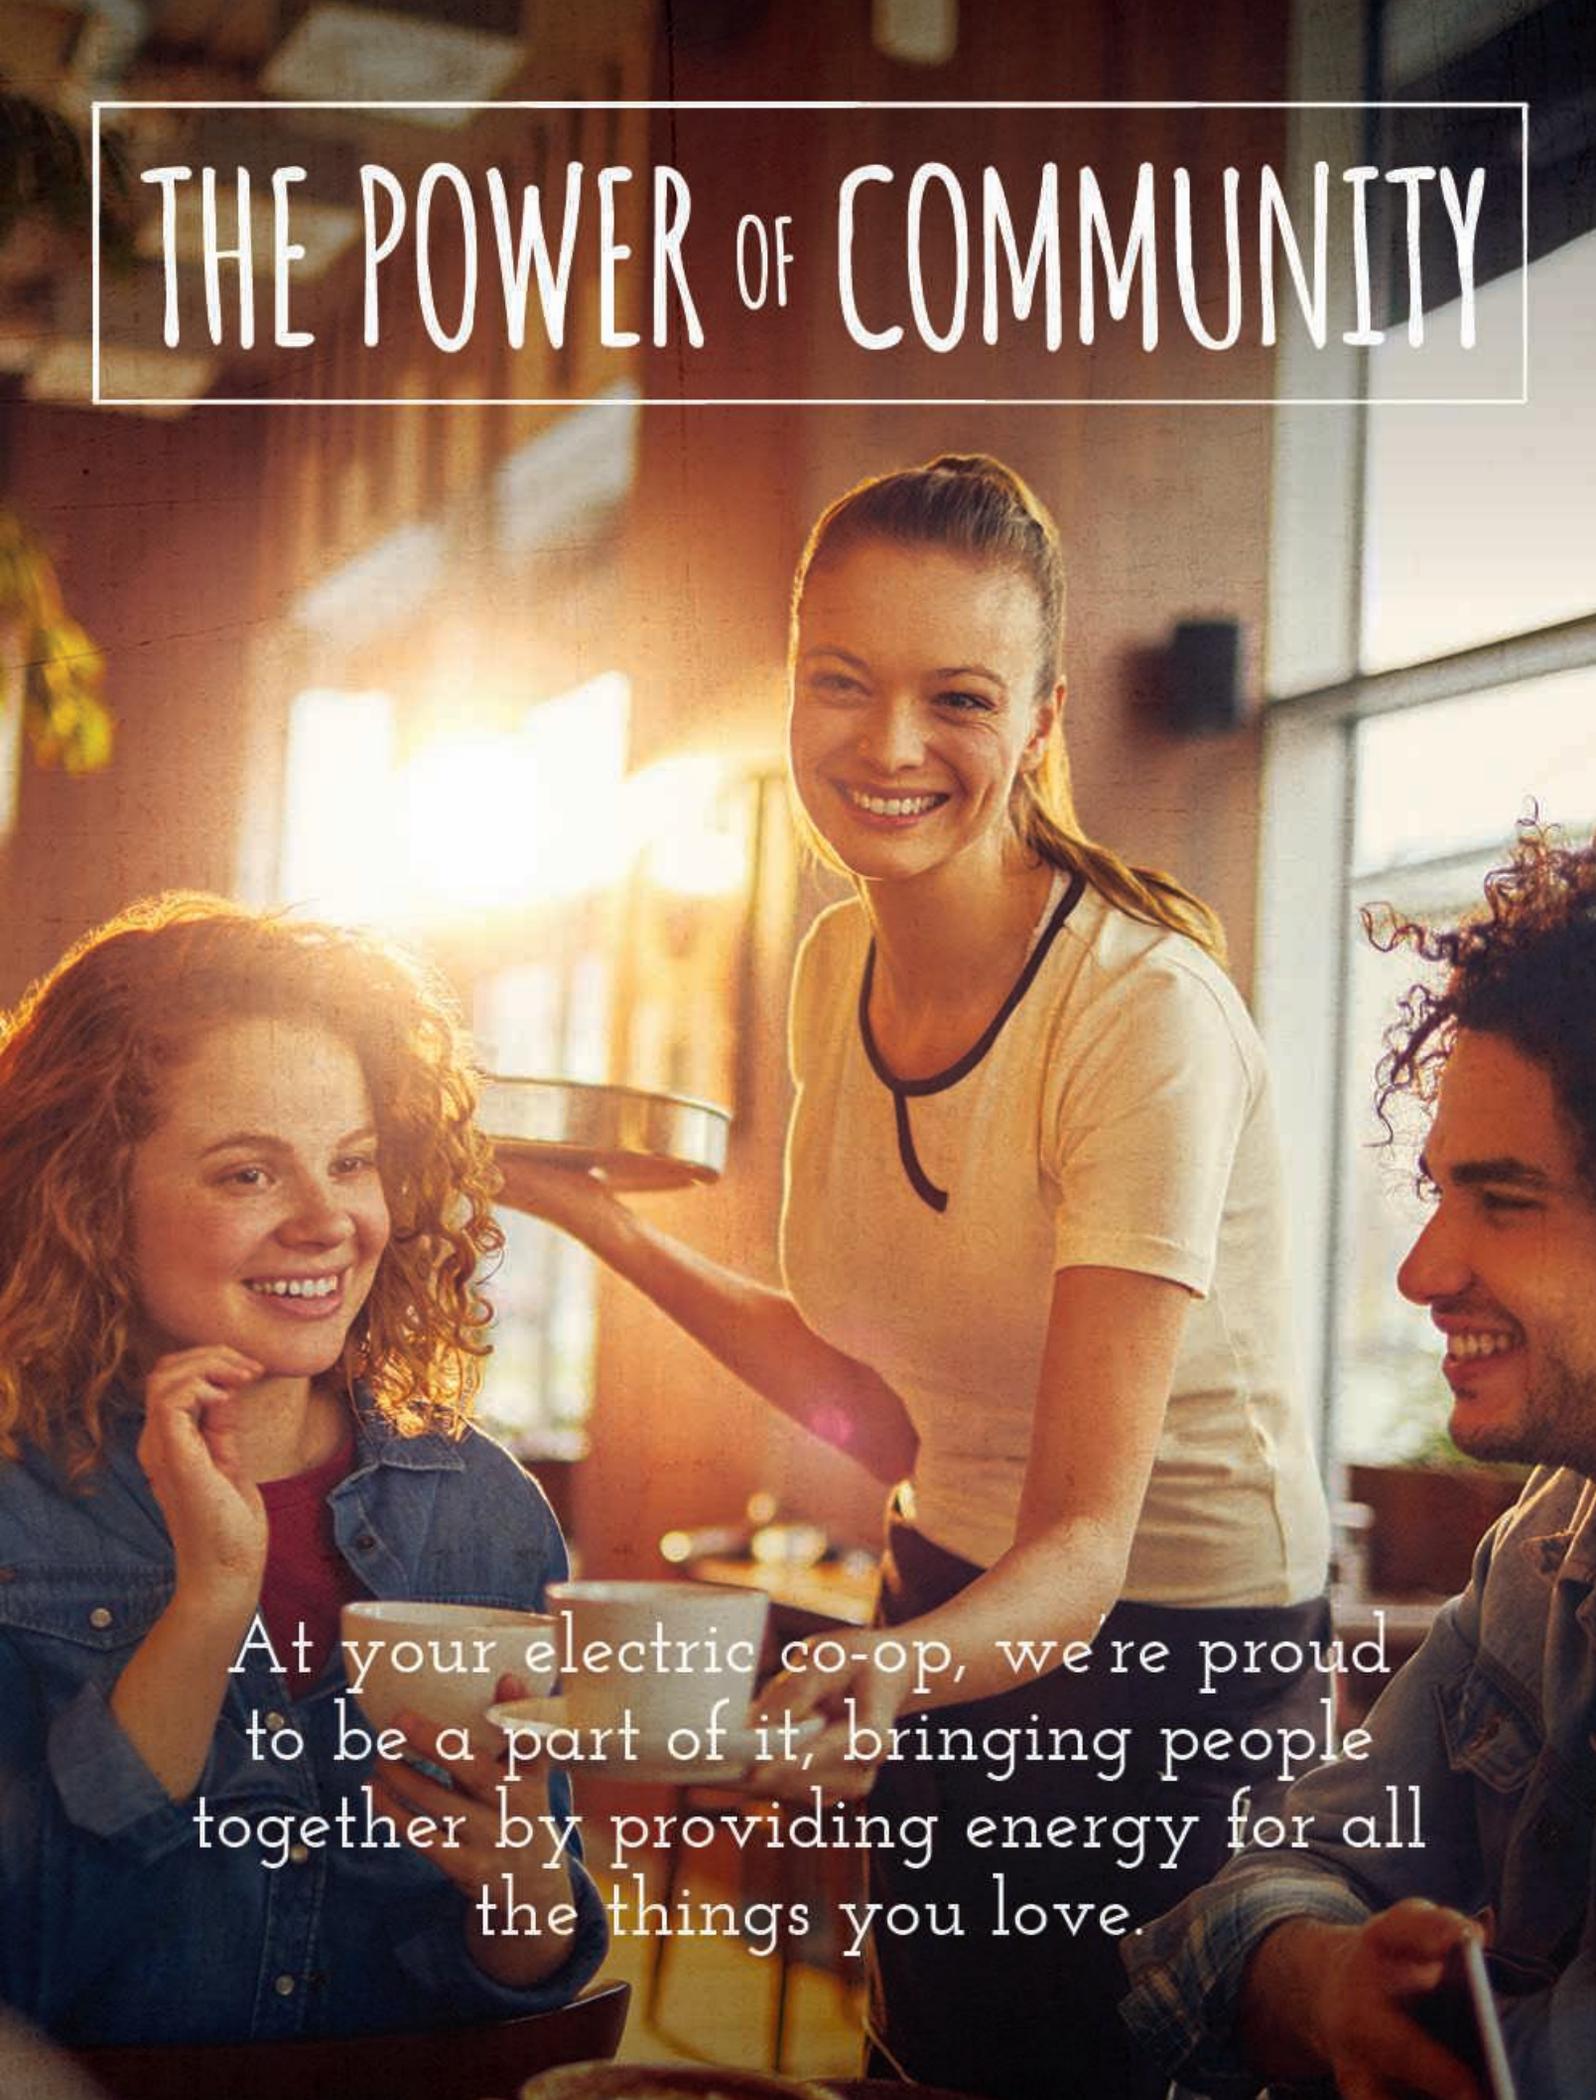

**Co-op lines are shaped by you, the members we serve, right here in our local community.**

working with the latest energy efficiency technologies or keeping the electric grid safe and secure, your electric co-op can offer solutions that make the most sense locally.

**Your co-op cares about your community.** The co-op's top priority is to power the community. It is not owned by far-away, or even nearby, investors looking only for a good return on their money. Your co-op also partners with local organizations on community events, fundraisers, youth programs and more. We're your friends and neighbors. By investing in the local community, your electric co-op supports economic development and prosperity for all, right here at home.

And these are just a few ways you and your electric co-op are one of a kind.

# THE POWER OF COMMUNITY

A warm, golden-hour photograph of three people in a cafe. A woman in a white t-shirt is smiling and serving coffee to a woman with curly hair on the left and a man with curly hair on the right. The scene is lit with soft, warm light from large windows in the background.

At your electric co-op, we're proud to be a part of it, bringing people together by providing energy for all the things you love.

Spooky displays of all types are part of the annual Grey Goose Pumpkin Display near Pierre.

# PIERRE FAMILY'S DISPLAY IS SPOOKTACULAR

## Hundreds of Carved Pumpkins at Center Stage

**Brenda Kleinjan**

[editor@sdrea.coop](mailto:editor@sdrea.coop)

A Pierre, S.D.,-area family has taken a fall tradition of pumpkin carving to new heights, and widths, with their ever-expanding pumpkin display.

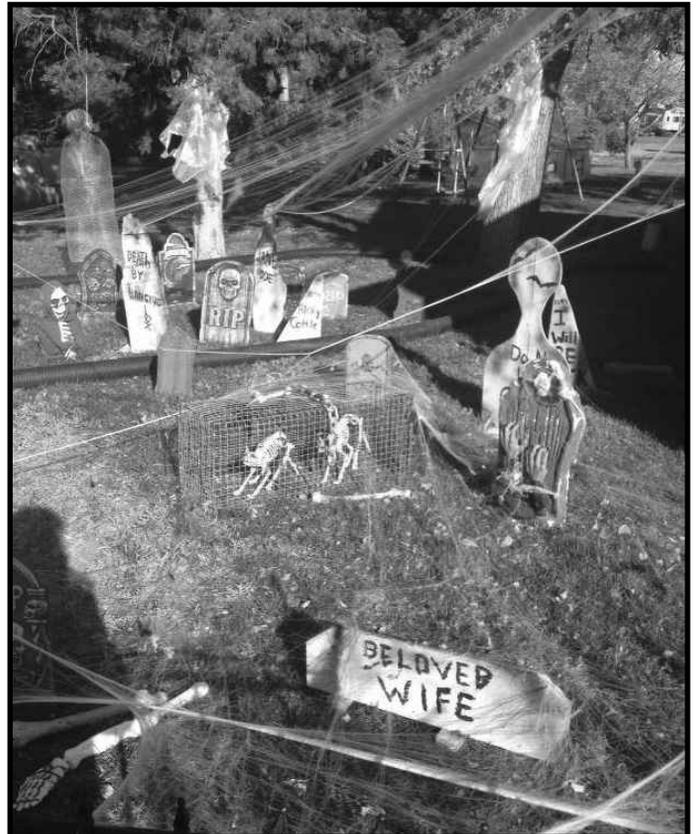

Since 2005, the Grambihler family has been turning its farm north of Pierre into a Halloween extravaganza. The display is typically open the last 10 days of October, concluding on Halloween.

The family is involved in all aspects of the process, including growing the hundreds of pumpkins that are carved into a variety of jack-o-lanterns.

The display can be seen from Gray Goose Road just north of Pierre. The best time to visit is in the evening, after the sun is setting.

All the pumpkins put on display are grown on the Grambihler farm and started right from seed. The different kinds of pumpkins raised are quite extensive and have many different shapes and sizes. The final number will be known when they are put out on display.

In preparation of the display, the Grambihler crew picks the good from the bad pumpkins. The week before they are set up, the pumpkins are gutted and set aside. As soon as all the pumpkins are cleaned, they are ready to be carved. Typically, the carving process starts three days before they are to be set out on display.

Frankie will be making his debut in the 2019 Grey Goose Pumpkin Display near Pierre.

The Grambihler family and other volunteers work many hours with the pumpkins. The display is all set up the week before Halloween. Creating the display generally takes all day, from setting up the decorations to setting the pumpkins in a line and stringing LED lights through them.

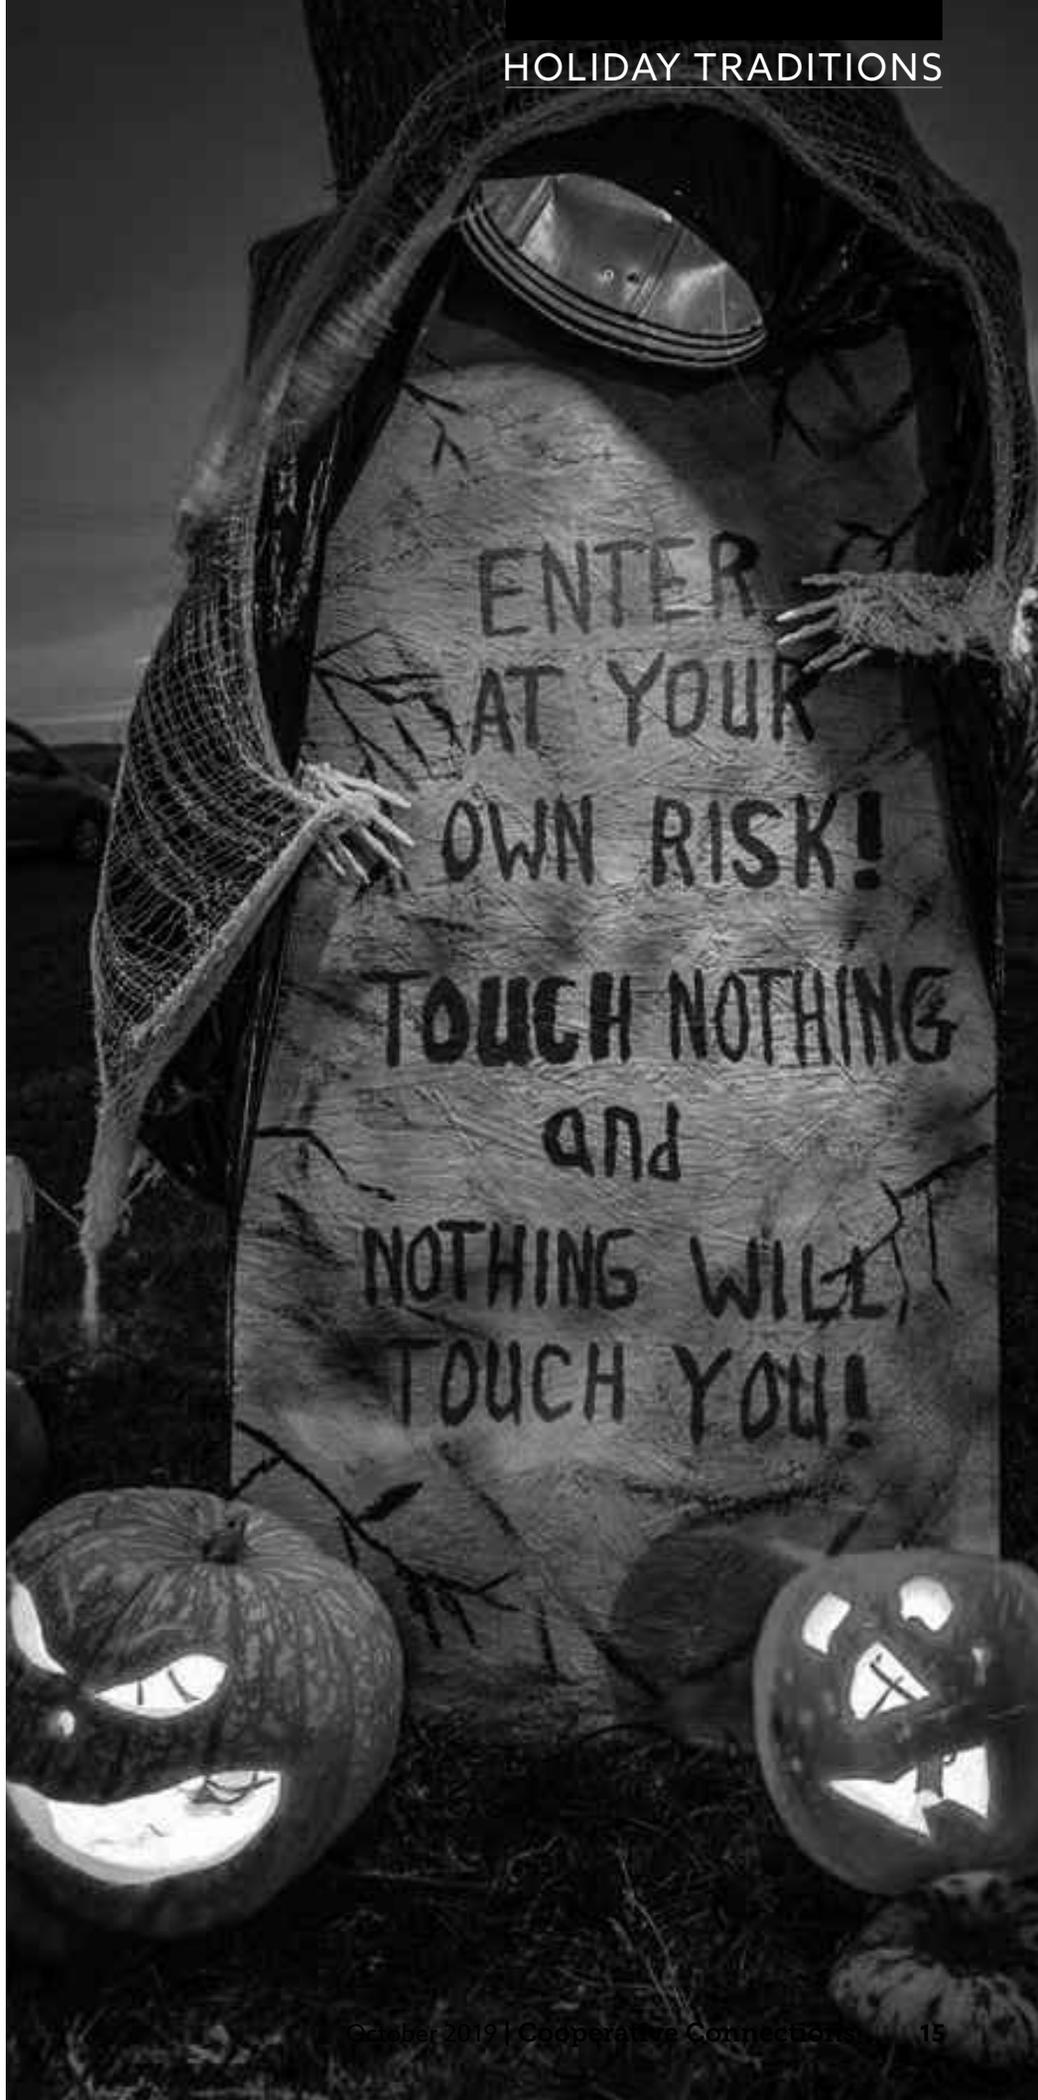

Directions to the 2019 Pumpkin Display are as follows: Turn onto Highway 1804 and go north for 5 miles, then turn onto Grey Goose Road and continue going north for about 4.5 miles. The glowing orange lights from the display are visible about a quarter-of-a-mile down the road and if you get lost, ask directions at the Grey Goose Store!

Please be mindful of the property owners.

The Grambihler families along with all the volunteers are dying for you and your families to walk around and enjoy the lit jack-o-lanterns, spooks and goblins!

Watch for other vehicles and pedestrians and have a safe Halloween!
